

**FM11RF08-M1**

- M1 Contactless Smart card, Frequency: 13.56MHz.

## ▪ Specification

| General                |                       |
|------------------------|-----------------------|
| Working temperature    | -20 °C -- + 75 °C     |
| Dimensions             | 85.5mm × 54mm × 0.8mm |
| Weight                 | < 5.6g                |
| Material               | PVC                   |
| Color                  | White                 |
| Card                   |                       |
| Card reading frequency | 13.56MHz              |
| Card property          | Thin Card             |
| Function               | Read/Write            |
| Card reading distance  | ≤10cm                 |
